1. Choose appropriate dataset of your choice from the following sites. However, students are free to choose any other relevant dataset for complex networks case study.

I have selected dataset from Kaggle.com <https://www.kaggle.com/code/vikassingh1996/netflix-movies-and-shows-plotly-recommender-sys/data>

Data contains Rows-5837, Columns-12

Netflix is a subscription-based streaming service that allows our members to watch TV shows and movies on an internet-connected device.

About this Dataset: Netflix is one of the most popular media and video streaming platforms. They have over 8000 movies or tv shows available on their platform, as of mid-2021, they have over 200M Subscribers globally. This tabular dataset consists of listings of all the movies and tv shows available on Netflix, along with details such as - cast, directors, ratings, release year, duration, etc.

In this dataset I have selected two features Source as "duration" and Target as "title" for the Network Analysis visualization purpose in order to know the series with more running time , degree of centralities, item which has most of scores compared to others.

The highest seen is 15 Seasons

Season simply means the collection of certain Episodes broadcasted within a certain time period in one season or year.

Q2) Create Complex Network from the chosen dataset and visualize it properly. If the dataset is too huge, then subset of data can be visualized.

I'm using the original dataset for network analysis. I have selected Title which is the name of Series or Movies and Duration to check the running durations of each movies or series. New "Data" is created.

```
In [9]: df = pd.read_csv("netflix.csv")
```

```
In [10]: Data = nx.read_pandas_edgelist(df, source="duration", target="title")

Q3) Frame 5 queries and corresponding evaluation metrics to answer those queries.

Q4) Give good visualization of the information retrieved from Q.3.

Q3.Query-1 Degree of Centrality "How many connection/ties does the below node mentioned has?"

```
In [15]: nx.degree(Data, '1 Season')
```

Out[15]: 1253

```
In [16]:
```

25

Q3.Query-2 Checking all nodes connected to the given node using Breadth First Search Tree Traversal

```
In [17]: new_group = nx.bfs_tree(Data,'137 min') #all the movies which have run for 137 mins
```

```
In [18]: new_group.nodes ## Output Displays all nodes connected to the node "137 min"
```

```
Out[18]: NodeView({'137 min', 'Defiance', 'Gosford Park', "Rosemary's Baby", 'The Man Who Feels No Pain', '7 Din Mohabbat In', 'Sur: The Melody of Life', 'High Society', 'Andhadhun', 'Monty Python Live (Mostly): One Down, Five to Go', 'Dev.D', 'Haani', 'Judge Singh LLB', 'Udaan', 'Rowdy Rathore', 'Socha Na Tha', 'Irada Pakka', 'Company', 'Teen Patti', 'Y.M.I.: Yeh Mera India', 'Papa the Great', 'Karzzzz', 'First They Killed My Father', 'Special 26', 'Pandora', 'Beasts of No Nation'})
```

List of All nodes Connected to the node "137 min" I have done this for confirmation of length mentioned above and clear vision of the listed nodes.

```
In [20]: nx.node_connected_component(Data,'137 min')
```

```
Out[20]: {'137 min',
 '7 Din Mohabbat In',
 'Andhadhun',
 'Beasts of No Nation',
 'Company',
 'Defiance',
 'Dev.D',
 'First They Killed My Father',

```

Before, I checked the Degree of centrality of a given node has, now I would like to know the degree of centrality of all nodes in the dataset.

```
In [21]: nx.degree_centrality(Data)
```

In the above list I would like to know the "duration" which has got the highest connections

```
In [22]: highest_connection = nx.degree_centrality(Data)
```

```
In [54]: for w in sorted(highest_connection, key=highest_connection.get, reverse=True):
    print(w, highest_connection[w]) # which means number of movies which have run for 1 Season is higher compared
```

```

```
In [27]: plt.figure(figsize=(50,50))
nx.draw_networkx(connection_1season)
plt.show()
```

Similarly I tried visualizing other nodes too

```
In [28]: nx.node_connected_component(Data, '12 Seasons') # All connections of the node "12 Seasons"
Out[28]: {'12 Seasons', 'Criminal Minds', 'Trailer Park Boys'}
```

Highest number of Seasons covered in this dataset is '15 Seasons' therefore I would like to know the movies connected to "15 Season"

```
In [29]: nx.node_connected_component(Data, '15 Seasons') # highest number of seasons covered in this dataset is 15
Out[29]: {'15 Seasons', "Grey's Anatomy", 'NCIS'}
```

this says that "Greys Anatomy and NCIS is of high demanding so that it have run for 15 Seasons and only two movies have run for 15 seasons"

```
In [30]: connection_15season = nx.bfs_tree(Data, "15 Seasons")
In [31]: nx.draw_networkx(connection_15season)
plt.figure(figsize=(10,10))
plt.show
Out[31]: <function matplotlib.pyplot.show(close=None, block=None)>
```

Q3.Query-4 Closeness Centrality. I would like to know the shortest connection between nodes, so I have used Closeness Centrality Central method.

In [35]: `nx.shortest_path(Data, 'The Liar and His Lover', '116 min')`

Out[35]: `['The Liar and His Lover', '1 Season', 'Shadow', '116 min']`

In [37]: `nx.shortest_path(Data, '92 min', '1 Season')`

Out[37]: `['92 min', 'The Saint', '116 min', 'Shadow', '1 Season']`

Q3.Query-5 Observing Betweenness Centrality or a Bridge Connection

TV-14 , TV-MA, TV-PG , Retc comes top in 1 season "May be more audience for these group of peoples and that is the reason it has more run"

Therefore I would suggest Netflix to select types of shows based on more run and more demanding for Audience like Season 1 to Season 15 preferably.

Thankyou!!
